# How I built a micro-SaaS with $0 in server costs.

50 20 200

**Shezan**

@Shezan

Most founders waste 3 months building a login screen and a Postgres database.

53 27 213

**Shezan**

@Shezan

I skipped the database completely. Every piece of user data lives securely in localStorage.

56 34 226

**Shezan**

@Shezan

Users bring their own API keys. I pay absolutely nothing for AI generation.
